

vyaire™
MEDICAL

fabian Therapy evolution
our 2-in-1 device

When it comes to Life,
there is no Compromise

DISTRIBUTING WORLDWIDE

VYAIRE Medical manufactures and markets more than 27,000 unique products for the diagnosis, treatment and monitoring of respiratory conditions in every stage of life. We are a singular, focused company offering products in four areas: respiratory diagnostics, ventilation, airway management and operative care consumables. VYAIRE Medical develops, manufactures, and distributes high-tech ventilation and monitoring solutions for neonatal, pediatric and adult ICUs and intensive care transportation. When it comes to the most critical areas of respiratory care, we are the leading partner for hospitals in ICU, neonatology, pediatrics, jet ventilation, and difficult airway management.

FORWARD THINKING

Our aspiration is to develop innovative solutions that simplify the busy clinical routine for caregivers and increase patient safety. With over 30 years of experience and together with our global network of clinical experts, we are able to quickly translate new developments into real innovations – and keep challenging ourselves to improve and set new benchmarks.

EXPLORING WHERE OTHERS STOP

Our products have an excellent reputation for precision, quality, and service in the industry. We strive every day to provide the best solutions for the most challenging groups of patients. We continue to explore where others stop.

fabian Therapy evolution our 2-in-1 device

From delivery room to NICU: the fabian Therapy evolution offers the best respiratory treatment solutions – normally available from different devices – in a single device.

EASE OF USE

Putting the focus back on the baby: the fabian Therapy evolution is designed from a user's point of view, minimizing the time needed to manage ventilator controls.

DEVELOPMENTAL CARE

Particularly silent, optimized handling of the baby, bonding and kangaroo care. The fabian Therapy evolution is designed to fully support these concepts in a low-stress environment.

PATIENT SAFETY

Keeping babies safe and protected whenever they are ventilated is the starting point of all our thoughts – and that includes easy maintenance with only a few parts for disinfection and sterilization, reduced Work Of Breathing (iWOB) and much more.

MODULARITY

Future-oriented: a wide choice of NIV modes for all your needs and compatible with most NIV interfaces today.

MOBILITY

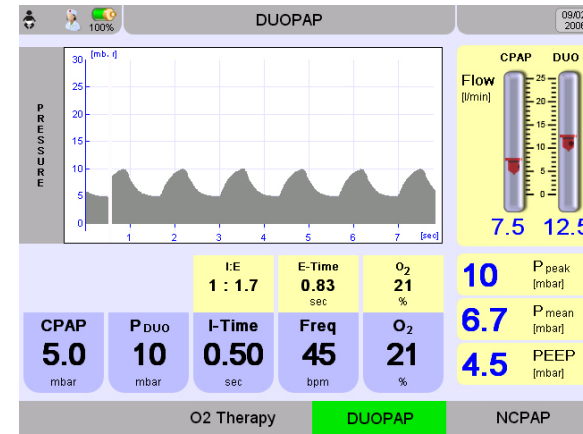

Designed for mobility: thanks to its compact and intelligent size, the fabian Therapy evolution allows easy access to the baby at all times without even disturbing the bedside inside the NICU or PICU.

COMPATIBILITY & INTERFACE

The fabian Therapy evolution is equipped with several communication interfaces and service modes. This flexible system is also compatible with all breathing circuits currently available on the market.

Ease of use

A clear, bright touch-screen TFT with intuitive commands reduces human error and puts the focus back on the baby.

GRAPHICS

See waveforms, numeric data, loops, ventilator status, and more. Clearly displayed and represented.

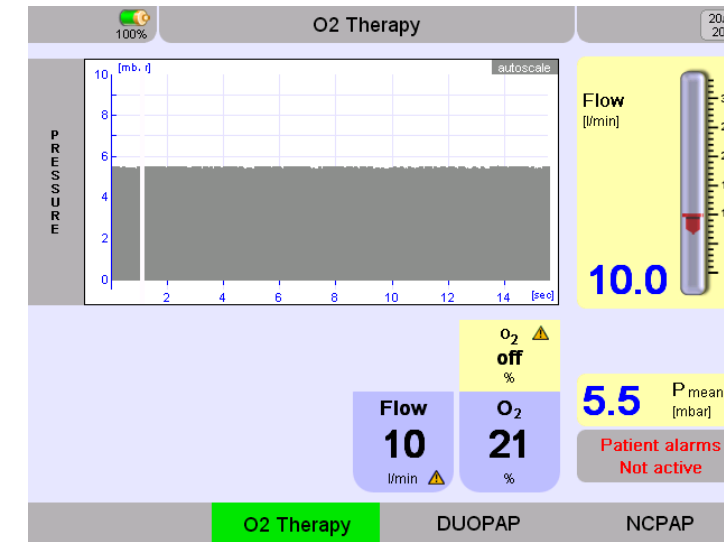

ONE-TOUCH PRINCIPLE

All operation procedures are carried out using a direct, time-saving and easy-to-understand one-touch principle.

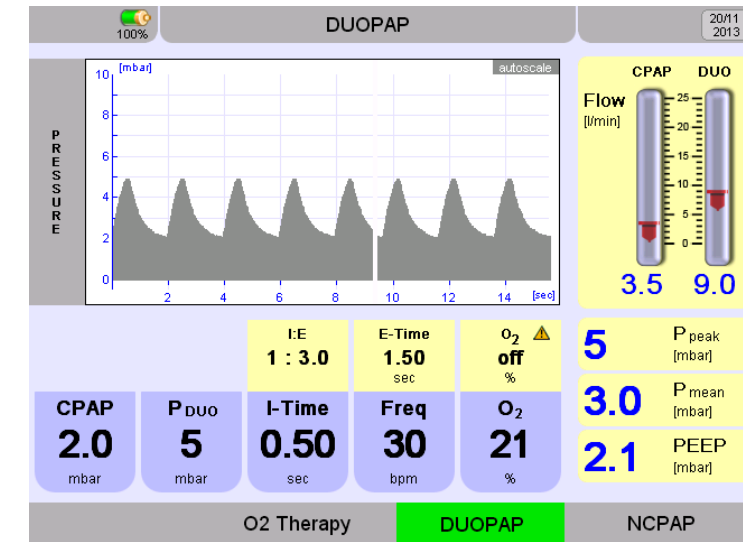

Modularity

A wide choice of NIV modes for all your needs and compatible with the most popular NIV interfaces available today.

2-IN-1

NIV plus High Flow Nasal Cannula (HFNC) available in one device for an easy and safe weaning program.

VENTILATION BEYOND LIMITS

nCPAP and DuoPAP modes, for nasal and mask ventilation, with automatic leak compensation, featuring two-level CPAP mode to improve CO₂ removal.

Developmental care

Premature babies are fragile. One of their special needs is quiet time for normal growth and development. Respiratory devices are a potential source of high noise levels and have a major impact on the baby's development process. The best ones are hardly heard or seen – they just do their job.

The Fabian Therapy evolution is equipped with highly precise electronic flow meters and innovative automatic leakage compensation: this makes it the most advanced non-invasive ventilator in the world today.

Patient safety

On the receiving end of our ventilators are the tiniest and most fragile patients imaginable. Keeping them safe and protected whenever they are ventilated is our first priority of all our thoughts.

- **Integrated lock function** to prevent inadvertent settings.
- **Easy maintenance** with few parts for disinfection and sterilization without any risk of infection inside the ventilator.
- **No bacterial filters** and therefore no risk of increased resistance during humidified ventilatory therapies.
- **Reduced error risk** thanks to the self-training ACUTRONIC concept inside.
- **Built-in backup battery pack** for up to 3 hours of self-powered operation.

Designed for mobility

Medical technology should speed up and simplify the work flow of clinicians. Interfaces should be familiar and intuitive. They should be consistent across different workstations, thus reducing the potential for error. Data should be entered just once and be available across multiple platforms to support decision-making.

Ultimately, innovations in ventilator design and clinical information management can improve both patient safety and outcomes, while supporting maximum flexibility.

COMPREHENSIVE DEVICE

Allowing easy access to the baby at all times. No disturbances at the bedside in NICU/PICU from device reshuffles.

LIGHTWEIGHT UNIT

Designed for safe, practical transportation with integrated electronic gas blender and built-in battery.

Compatibility & interface

SERVICE MODE

Service mode with advanced diagnostics via USB port, standard Ethernet connection.

FLEXIBLE & SCALABLE

The system is flexible and can be used with all conventional breathing circuits currently available on the market.

COMMUNICATION INTERFACE

Digital interface with hospital information systems, download settings and monitoring data.

The new fabian family

The new fabian generation consists of three Gold Club members. Each one represents the benchmark in its class, either in non-invasive, conventional or sophisticated high frequency ventilation. They are configured for your specific needs and can be upgraded with further options.

fabian HFO our 4-in-1 device

The latest edition of fabian HFO comes with the HFO fully integrated into the inspiratory port. No additional tubing for HFO needed. Furthermore, the fresh gas port allows for easier use of NO systems. The fresh gas port also function as the nCPAP port, making it even easier to switch modalities.

fabian +nCPAP evolution our 3-in-1 device

The fabian +nCPAP evolution is a therapy system encased in a small yet powerful device. Ideal for NICU, PICU and transport applications.

fabian Therapy evolution our 2-in-1 device

The fabian Therapy evolution is the smallest but not the least powerful fabian family member. A true, complete and highly advanced non-invasive ventilator featuring all classic and new NIV modes.

Finding your device

Non-invasive, conventional or sophisticated high frequency ventilation. No matter which product you choose, you're getting a device that features the latest technology and is ready to ventilate beyond limits.

Technical specifications

Functionality

The **fabian Therapy evolution** is intended for premature infants, newborns as well as children weighing up to 30 kg.

Intended Use

The **fabian Therapy evolution** is intended for "in-patient use" in hospitals, medically-used rooms and intra-hospital patient transport.

The **fabian Therapy evolution** is an electronically, microprocessor controlled CPAP and Bilevel CPAP generator.

The **fabian Therapy evolution** generates CPAP and Bilevel CPAP (*duoPAP*), with automatic dynamic control of flow inside the nasal pressure generator (*i.e. Infant Flow LP®*).

Oxygen concentration (FiO_2) is metered by the integrated air/ O_2 electronic blender

Ventilation modes

Non-Invasive Ventilation (*NIV*) with single limb circuits: nCPAP and duoPAP with variable flow pressure generators (*i.e. Infant Flow LP®*)

HFNC (*HFOT*) - O_2 Therapy

PRICO (*PRedictive Intelligent Control of Oxygenation*), option with Masimo® SpO_2 sensor technology

Enhancements

NIV with leak compensation

NIV Trigger, for flow triggered duoPAP and Apnea detection.

Flow and Volume waves in nasal CPAP.

SpO_2 with Masimo® SpO_2 sensor technology

Special procedures

Manual inspiration/hold (*Sustained Lung Inflation*)

O_2 flush

PRICO, option

Dimension

(*W x H x D*) 24 cm x 27 cm x 35 cm

Approx. 10 kg. HFO module

Diagonal screen size 5.7"

TFT color touch-screen with LED backlight

Keypad with 14 buttons

Input and output ports

1 USB port (*for SW updates*)

1 RS 232 (*9 pin*) port for PDMS/HIS

1 RJ 45 Ethernet port for PDMS/HIS

1 nurse call connector

External trigger connector

Designed in Switzerland

The fabian Therapy evolution is the result of more than 30 years of experience in design, development and craftsmanship. Powerful components like a precise electronic gas blender and a cleverly reduced assembling concept with easily accessible parts make this device user-friendly.

Together with a customized service program, fabian helps to minimize the cost of ownership.
